

Space Commission Implementation Army Perspective

LTG Joseph M. Cosumano, Jr.
Commanding General, U.S. Army Space & Missile Defense Command

“As a space-empowered force, the future Army will depend on both military and commercial space platforms for intelligence, information, communications, sensing, targeting, warning, positioning, navigation, timing, and missile defense.”

Objective Force O&O Concept

Force Enhancement In Afghanistan

**Laptop Computer
Satellite communications gear
GPS trackers
Laser designators**
